INTRODUCTION

The Yukon Bureau of Statistics is a focal point in the Yukon for statistics from the 1986 Census. In addition to the full range of materials in the Bureau's Statistical Resource Centre, a two part series of print publications providing community information from the Census has been developed. Part 1 provides basic demographic, housing and family characteristics collected from all households. When completed, Part 2 of the **Yukon Census Profiles** will present social, cultural, labour and 1985 income data along with additional information on housing and families collected from a 20% sample of households.

The format of the two parts of the **Yukon Census Profiles** allows for a complimentary series of **Census Information Sheets**, each sheet dealing exclusively with one Yukon community. Copies of the **Census Information Sheets** for a particular community may be obtained through the Yukon Bureau of Statistics.

All of the data found in the **Yukon Census Profiles** is based solely on the results of the 1986 Census of Canada which occurred on June 3, 1986. The data in Part 1 may be found specifically in Statistics Canada Catalogue 94-121.

For further information on the 1986 Census or on other publications available from the Yukon Bureau of Statistics, please contact:

Confidentiality and Random Rounding

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possiblity of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". Since totals are independently rounded, they do not neccessarily equal the sum of individual rounded figures in distributions. Similarily, percentages, which are calculated on rounded figures, do not necessarily add to 100. Small cell counts may suffer a significant distortion as a result of random rounding. Since the rounding is of a random nature, however, when data cells are reaggregated by the user, the rounding errors tend to cancel out.

Indian Reserve (R)

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to the terms of the Indian Act.

Indian Settlement (S-E)

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada ***for statistical purposes only****, where a self-contained group of at least 10 Indian people reside more or less permanently. Indian settlements are usually located on Crown lands under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.*

Footnotes

1. Based on 1986 area.

2. For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented".

3. Includes semi-detached houses, row-houses, other single attached houses, apartments or flats in a detached duplex and apartments in a building that has less than five storeys.

4. The average number of children per census family is calculated using the total number of children at home and the total number of census families.

5. May include non-relatives.

Footnotes

1. Based on 1986 area.

2. For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented".

3. Includes semi-detached houses, row-houses, other single attached houses, apartments or flats in a detached duplex and apartments in a building that has less than five storeys.

4. The average number of children per census family is calculated using the total number of children at home and the total number of census families.

5. May include non-relatives.

Two and One-Half Mile village and Two Mile village are located just north of Watson Lake.

Footnotes

1. Based on 1986 area.

2. For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether ortginally reported as "owned" or "rented".

3. Includes semi-detached houses, row-houses, other single attached houses, apartments or flats in a detached duplex and apartments in a building that has less than five storeys.

4. The average number of children per census family is calculated using the total number of children at home and the total number of census families.

5. May include non-relatives.
